ABOUT ICFIP

Image processing is now routinely used by a wide range of individuals who have access to digital cameras and computers. With a minimum investment, one can readily enhance contrast, detect edges, quantify intensity, and apply a variety of mathematical operations to images.

The purpose of ICFIP 2019 is to bring authors and editors of JOIG together to communicate face to face and discuss their latest research results. And it is also the Annual Meeting of JOIG editorial board.

PUBLICATION

Conference Proceedings

Accepted papers will be published in the conference proceedings, which will be indexed by EI Compendex, Scopus, etc.

JOIG

Accepted papers will be published in Journal of Image and Graphics, which will be indexed by Google Scholar, Crossref, etc.

TOPICS

- Image Coding
- Image Segmentation
- Feature Extraction
- Image Storage
- Mobile and Wireless GIS
- Remote Sensing
- GIS Application
- Multisource Data Fusion
- GPS Technology
- Computational Geometry
- Animation and Simulation
- Interactive Environments
- Virtual environments
- Augmented Reality
